Michael McEnery

Senior Software Engineer
Augusta, GA • mike.mcenery1@gmail.com

SUMMARY

Senior Software Engineer with 18 years of full-stack experience building and modernizing web and desktop applications across healthcare, secure communications, and government training. Skilled in C#/.NET, React, Vue, Python, PHP, SQL, and AWS, and experienced in agentic AI coding with Claude Code. Track record of leading Agile teams, migrating legacy systems to modern and cloud platforms, and partnering closely with product owners and end users to deliver reliable, user-focused software.

TECHNICAL SKILLS

Languages: C#, JavaScript, Python, PHP, SQL, HTML, CSS
Frameworks: .NET 8, .NET Framework 4.8, ASP.NET MVC, ASP.NET Web API, Razor Pages, React, Vue.js, CodeIgniter, WPF (Caliburn.Micro / MVVM)
Databases: SQL Server, MySQL
Cloud: AWS (Lambda, S3, EC2, SES)
AI Development: Agentic AI coding with Claude Code, AI-assisted development and code review
Tools & Process: Git, GitHub, Azure DevOps, Jira, Agile (Scrum, Kanban)

PROFESSIONAL EXPERIENCE

Crypton Mobile

Senior Software Developer Oct 2024 – Present

- Develop and support client-facing features for a secure communications and document platform
- Build and maintain e-signature functionality supporting secure, legally binding document workflows
- Implement AI-powered identity verification to authenticate users and reduce fraud risk
- Maintain SMS and email messaging services for reliable client notifications and communication
- Implement RCS (Rich Communication Services) messaging to extend client communications beyond standard SMS
- Migrate existing software systems to new cloud-based environments
- Contribute to Secure Vault Storage, providing encrypted storage and controlled access to sensitive documents
- Use Claude Code for agentic AI development to accelerate feature delivery, refactoring, and code review

Coronis Health (formerly Miramed and Medac) **May 2011 – Aug 2024**

13 years with one organization through two ownership changes: Medac was acquired by Miramed, which later merged to form Coronis Health. Promoted from Tier III Support to Lead Software Engineer.

Lead Software Engineer Aug 2022 – Aug 2024

- Built and led a development team, introducing Scrum practices for an accounts receivable management application built on PHP and CodeIgniter
- Partnered with the product owner to define requirements for new features and workflow improvements driven by customer requests
- Designed and managed MySQL schema changes, including tables, stored procedures, and triggers
- Developed a migration tool that moved multiple teams' work from Azure DevOps to Jira
- Created a PDF-to-TIFF conversion application to improve the accuracy of an OCR document-processing pipeline

Senior Software Developer
Apr 2015 – Aug 2022

- Developed an ASP.NET REST Web API backend serving client web applications built in React and Vue.js
- Co-designed a hybrid modernization approach linking legacy applications with a new WPF application built on Caliburn.Micro (MVVM)
- Supported migration of the on-premises network to the cloud by updating and monitoring existing applications
- Built a Vue.js search application that improved data visibility across the system
- Created a React survey component used to gather user feedback that informed company direction
- Developed an image upload management application with optimized database records and file structure for faster lookup

Software Developer
Jun 2013 – Apr 2015

- Rewrote legacy systems as web applications using ASP.NET and Razor Pages as part of a development team
- Gathered feedback through end-user focus groups and implemented changes to meet their needs
- Maintained Classic ASP sites, delivering new features and resolving defects

Technical Support, Tier III
May 2011 – Jun 2013

- Maintained legacy Visual Basic 6 medical billing systems through a support ticketing system
- Delivered feature requests and bug fixes through a formal sign-off and release process
- Researched the codebase to give other support staff accurate answers to technical questions
- Managed SQL database changes, including tables, stored procedures, triggers, and scheduled tasks

C4 Planning Solutions

Software Engineer
May 2008 – May 2011

- Developed ASP.NET web applications supporting internal business needs
- Collaborated on Department of Defense (DoD) training materials, creating animations and interactive content with 3ds Max and Adobe Flash

EDUCATION

Augusta Technical College – Computer Science Coursework 2008

Coastal Carolina Community College, Jacksonville, NC – General Studies Coursework 2005
